Intelligent Integration and shipping for Microsoft Dynamics 365 Finance & Operations

Microsoft Dynamics 365 Finance and Operations is a complete web based ERP that comes up with all required features for the organization from finance and operations. Being one of the leading partners of Microsoft D365, AXGuru has made some additional features on top of D365 platform leveraging the power of D365.

Looking ahead, we will continue to maintain a sharp focus on our guiding principles and commitment to innovate, improve and extend the product in the markets we serve today.

INTEGRATE WITH TOP SHIPPING COMPAINES

You want to send your goods internationally, so we are providing you top International shipping companies like

Integrated with leading e-commerce platforms
Amazon, eBay & **Walmart**
Fulfill and ship your online orders through **ShipGuru**

KEY FEATURES

Multiple Shipping Services

ShipGuru provides multiple shipping and delivery services integration with Microsoft© Dynamics 365 inventory and warehouse management.

One Window Logistics Solution

We are providing one Window Logistics Solution, from Inventory until delivery, all processes included in a single window.

24/7 Dashboard Access

Your data is live 24/7 and so should your dashboards. Modern dashboard software should provide you 365/24/7 access from wherever you are.

Variety of Shipping Options

A strong indicator of a reliable freight shipping provider is the availability of shipping choices. Dependable providers will offer a multitude of options. When a freight company offers various services, more of your business needs can be handled under one roof.

Cloud Storage

As a web-based solution, you'll never have to worry about installing or configuring new software or third party web controls or paying for expensive servers.

Real-Time information

ShipGuru provides real time information: Price shipments at creation, management reports, KPIs, revenues, costs, transaction logs, etc. All this information is available at your fingertips 24/7.

Support Ticket Management

A support ticket system allows users to communicate issues quickly and efficiently without having to pick up the phone. Tickets can be created to resolve issues such as lost or damaged shipments or system feature requests.

Returns Management

With ShipGuru you control the entire journey of the workflow, from point of sale to delivery and returns. Customers can log onto the portal and access the simple 'Return Your Order' function to print off a label and return directly to the retailer.

Shipment Types

ShipGuru covers multiple shipment type such as:

- Mail
- Parcel
- Same Day
- National
- Pallet
- Own Driver
- Returns
- International
